POWERSPORTS DATA SUITE

VINBasic™ Powersports

VINBasic™ Powersports provides decoding of year, make, model, trim, ABS, pricing and engines for motorcycles, scooters and select off-road powersports vehicles.

VINBasic™ Powersports supports a variety of needs including VIN decoding, validation, and verification. It is frequently used to normalize vehicle data to the OEM/brand compliant standard for vehicle descriptions, making

What's included:

- Street legal motorcycles and scooters for 64 OEMs including all major brands through to most of the smaller brands that have production output that meets criteria for distinct VIN “make” encoding.
- ATVs and UTVs for 26 OEMs including the following 9 major brands: Arctic Cat, Can-Am, Honda, John Deere, Kawasaki, KYMCO, Polaris, Suzuki, and Yamaha, and snowmobiles for Arctic Cat, Polaris, Ski-Doo, and Yamaha.

File Format & Delivery: API web service or delimited file with daily updates via SFTP

Data Scope: US motorcycles & scooters 1996-current model year / US ATVs, UTVs & snowmobiles 2004-current model year.
